SUMMARY

Third-year Computer Science and Engineering student building full-stack web applications with React, Node.js, and MongoDB/MySQL. Comfortable across the stack – from REST API design to responsive UI to database schema decisions – with hands-on internship experience in Python development and data science. Looking for a full-stack developer role to build production-grade features end to end.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript

Frontend: React.js, HTML5, CSS3, [state management / styling library – e.g. Redux, Tailwind]

Backend: Node.js, [Express – confirm], REST API design

Databases: MySQL, MongoDB, Firebase

Tools & Platforms: Git/GitHub, VS Code, [deployment platform – e.g. Vercel, Render], AI-assisted dev tools

PROJECTS

Smart AI Retail Analytics System with Multi-Store Management *[React / Node.js / MongoDB – confirm actual stack]*

- Built a multi-store retail analytics platform with a [React] frontend and a [Node.js/Express] backend exposing REST endpoints for sales and inventory data across locations.
- Designed interactive dashboards ([chart library, e.g. Chart.js/Recharts]) to visualize store-wise performance and surface trends across branches.
- Integrated AI-driven insights into the data pipeline to support data-informed retail decisions; [add: DB schema design, auth, or query optimization detail if applicable].

Real-Time Data Analysis Using Firebase *[Frontend framework] / Firebase Realtime Database*

- Developed a real-time data pipeline using Firebase for live synchronization between backend data sources and connected clients.
- Implemented cloud-based storage and retrieval with optimized read/write patterns to maintain performance under continuous data flow.
- [Add if true: built a frontend that consumes this data live – e.g. 'built a React dashboard subscribed to Firebase listeners for sub-second UI updates'].

Cybersecurity: Threats and Prevention *Independent Research*

- Researched common cybersecurity threats – malware, phishing, and network vulnerabilities – and implemented preventive best practices.
- Compiled findings into a structured report outlining practical defense strategies.

Note: consider adding a 4th project that is explicitly end-to-end full-stack (React frontend + Node/Express API + database + deployed link) – this is the single strongest addition for full-stack applications.

EXPERIENCE

Python Development Intern *RD Info Technology*

- [Add 1-2 bullets on what you actually built/automated during this internship – specific scripts, tools, or tasks.]

Data Science Virtual Intern *CodSoft*

- [Add 1-2 bullets on datasets used, models built, or analysis delivered.]

EDUCATION

Degree	Institution	Year	CGPA / %
B.Tech – Computer Science & Engineering	Rajalakshmi Institute of Technology, Chennai	2026 Present	– 8.87 / 10

Class XII	CSI St. Hilda's & St. Hugh's Matric Hr Sec School	2024	93.3%
Class X	CSI St. Hilda's & St. Hugh's Matric Hr Sec School	2022	94.4%

ACHIEVEMENTS & INTERESTS

- Maintained a strong academic record with a CGPA of 8.87/10 in B.Tech CSE.
- Completed two structured internships in Python Development and Data Science.

Interests: Public speaking & writing, chess & strategy games, badminton, cricket, kabaddi, travel. Languages: English (Fluent), Tamil (Native).
